**see separate sheet**

**Box No. VIII Certain observations on the international application**

---

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

**see separate sheet**

**Re Item VIII.**

1. **Claims 39-43** contain references to the description and the drawings. According to Rule 6.2(a) PCT, claims should not contain such references except where absolutely necessary, which is not the case here.

As a result, the subject-matter of these claims is not clearly defined, such that the requirements of Article 6 PCT are not met.

**Re Item V.**

2. Reference is made to the following document:  
D1 : US 4 714 370 A (CHEN ET AL) 22 December 1987 (1987-12-22)

3. NOVELTY AND INVENTIVE STEP

- 3.1 D1, which is considered to represent the most relevant state of the art, discloses (cf. col. 2, l. 32-47; Fig. 2; the references in parentheses applying to this document):

- A bracket suitable for engaging one or more struts,
- comprising a body portion ("body 2") and one or more arm portions extending from the body portion ("shaft arms 22").

From this, the subject-matter of independent **claim 1** differs in that the arm portions include:

- At least one pair of parallel grooves adapted to releaseably engage complementary lips of the strut;
- and at least one recessed region adapted to securely engage one or more crimped portions of the strut.

The subject-matter of claim 1 is therefore **novel** (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as facilitate mounting of the struts, cf. the description on p. 6, l. 23-31.

The solution to this problem proposed in claim 1 of the present application is

INTERNATIONAL SEARCHING  
AUTHORITY (SEPARATE SHEET)

PCT/GB2005/002609

considered as involving an **inventive step** (Article 33(3) PCT) since none of the documents cited in the search report describe such a solution, in particular such a recessed region.

3.2 As a further result, the corresponding method **claims 22 and 36** are also considered as novel and as involving an inventive step.

3.3 **Claims 2-21, 23-35 and 37-43** are dependent on claim 1, 22 and 36, respectively, and as such also meet the requirements of the PCT with respect to novelty and inventive step.

4. FURTHER OBJECTIONS

4.1 Independent claim 1 is not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate.

4.2 The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
